

“Black Box” Bowls Laser

The Black Box Bowls Laser (BBBL) is hand made to ensure quality and an accurate finish.

Each BBBL unit can be engraved with the owners name or club name, if required.

The unit can be carried in a pocket or attached to a belt with the included belt clasp. Choice of two clasp styles

Each unit consists of two compartments :-

- the top section houses the measuring laser
- The bottom accessories section stores a set of calipers and a USB cord for recharging the battery.

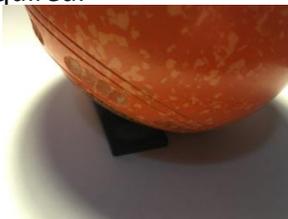

The sliding lids from each compartments are used in the measuring process as displayed in the attached operating instructions.

Laser lid is used as the base measuring point

Accessories lid can be used as a wedge

The accessories lid is shaped to be utilised as a bowls wedge. The calipers can also be used as a bowls wedge, if required.

The BBBL will record up to 4 readings . Each reading is accurate to within 3 decimal points.

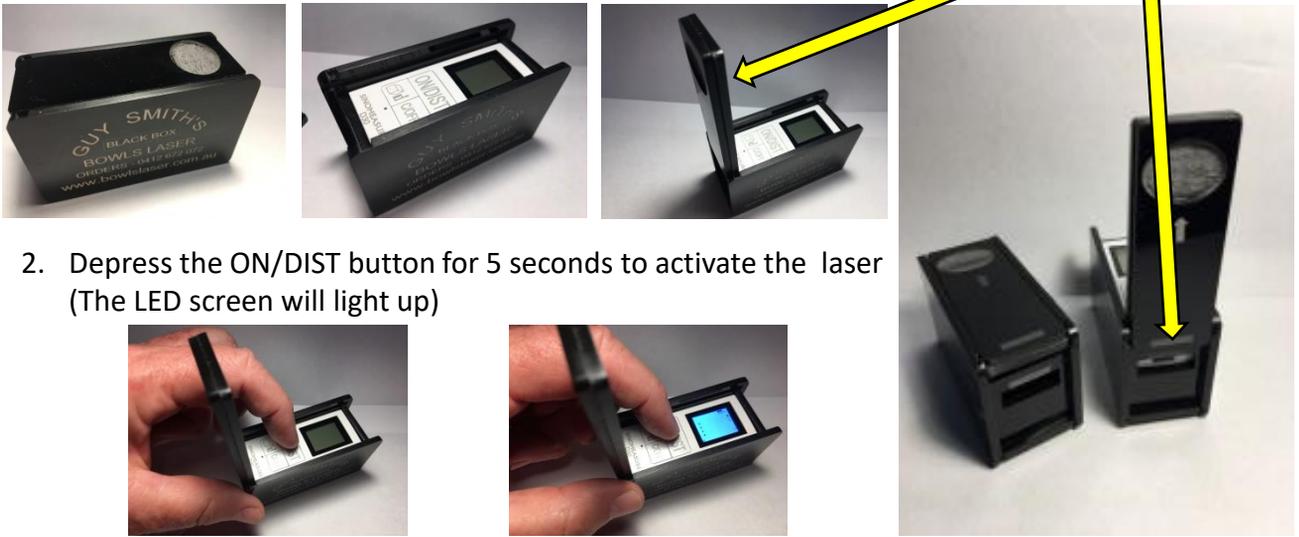

All readings are taken from the target bowl back to the centre of the jack.

Ensure the laser is recharged on a regular basis. A battery charge level is display on the LED Screen

Operating Instructions

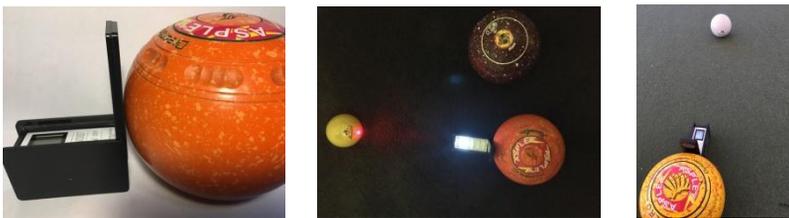

1. Slide out the top lid cover of the laser and insert into the vertical grooves located at the back of the box (Line up the rectangle symbol on the lid with rectangle symbol on the box) (The perpendicular structure then becomes the base for all laser readings.)

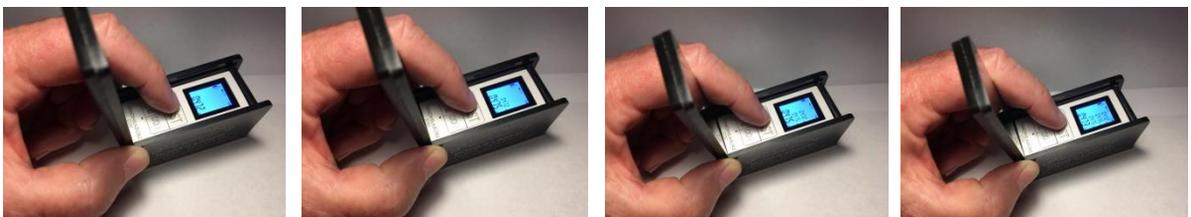

2. Depress the ON/DIST button for 5 seconds to activate the laser (The LED screen will light up)

3. Rest the perpendicular structure against the target bowl and aim the laser at the centre of the jack.
4. Press the ON/DIST button once and the red laser beam will be activated.
5. To get a reading aim the beam at the centre of the jack and then press the ON/DIST button ensuring the perpendicular structure is touching the target bowl.

6. Repeat instructions 3,4 and 5 for each bowl to be measured
7. The laser will record up to 4 reading while the unit is activated.

8. The lowest number reading will be the closest bowl to the jack.
